How to change the filter in my bestway pool

How to change filter in bestway pool. Bestway pool filter setup. Filter on bestway pool. How to use the filter on a bestway pool.

Are you fed up with the headaches of swapping out your Bestway pool filter? You're not alone! Many pool owners cringe at the thought of wasting precious water during this process. But it doesn't have to be a nightmare. Get familiar with the three main types of Bestway filters: cartridge, sand, and diatomaceous earth (DE), each needing different TLC. Regular maintenance is key to keeping your filter running smoothly. Schedule regular cleanings and replacements to prolong its lifespan and keep pool water sparkling clear while reducing strain on the pump. Before starting, make sure you're prepared with the right tools like gloves, pliers, and a bucket, and don't forget to turn off the power for electrical safety. Changing your Bestway filter is easier than you think! Follow these simple steps: shut down the pump, locate and remove the old filter, and securely install the new one. After changing the filter, establish a regular cleaning routine and monitor water levels to ensure optimal pool performance and prevent issues. Your Bestway pool filter plays a crucial role in keeping your pool clean and inviting. Understanding how they work will help you manage their maintenance efficiently. Each type of filter has its own unique needs: cartridge filters need occasional rinsing and replacement, sand filters require backwashing for cleaning, and DE filters demand regular powder replacement and thorough cleaning. Don't neglect your filter! Regular cleaning boosts its lifespan and prevents clogs, keeping your pool an inviting place to relax. Preparation is key to a hassle-free filter change process. Get the right tools, take necessary safety precautions, and you'll be swimming in clean water in no time! Changing Your Bestway Pool Filter: A Hassle-Free Guide Before diving into the process, ensure chemical splashes and debris are minimized. To start: 1. Turn off the power to the pump to guarantee a safe working environment. 2. Disconnect the power supply to prevent accidental starts. 3. Locate the filter assembly near the pool's pump. 4. Familiarize yourself with the layout for subsequent steps. Next, carefully detach the old filter from the assembly. For cartridge filters: 1. Twist off the top, lift out the cartridge, and let remaining water drain back into the pool. 2. Insert a new cartridge in the same position as the old one. 3. Securely reattach the lid, inspecting all seals and connections for gaps. For sand or DE filters: 1. Release the pressure valve before opening the lid to control any water. 2. Insert the new filter into the assembly, ensuring it fits snugly. 3. Follow manufacturer guidelines regarding correct amounts needed. 4. Reattach the lid securely. After replacing the filter, inspect all seals and connections for gaps and tighten any fittings necessary to prevent leaks. Finally: 1. Check the filter assembly to ensure everything is aligned correctly before turning the pump back on. 2. Establish a regular cleaning schedule for your filter to maintain efficiency and extend its lifespan. 3. Monitor your pool's water levels after changing the filter, ensuring it stays between 1-2 inches above the skimmer to keep the pump functioning properly. By following these steps and taking the time to prepare, you can efficiently change your Bestway pool filter and maintain a clean and inviting pool. Maintaining a sparkling pool throughout the season is key. By following these tips, you'll become proficient in keeping your pool clean without any hassle. To change your Bestway pool filter without losing water, first turn off the pump. Remove the old filter, install the new one, and secure the assembly. Make sure all seals are leak-free to prevent water loss. When replacing the filter, remember to always turn off the pump first to avoid electrical hazards. Wear gloves to protect yourself from dirt and chemicals during the process. Always follow manufacturer guidelines for safe handling and installation of the filter. Regularly rinsing your Bestway pool filter every two weeks will help maintain its efficiency and extend its lifespan. A cleaning routine is essential in keeping clean water, improving pump efficiency, and extending the filter system's lifespan. By adhering to a cleaning schedule and replacing the filter as needed, costly repairs can be avoided, and your pool's overall performance enhanced. For pool with 2 valves P61318 P61322 Garden hose (not included) For Drain, Backwash, Rinse function For pool with 3 valves S-S-005006 S-S-005006/21.0x28.5cm/#58401 Garden hose (not included) For Drain, Backwash, Rinse function P6680 STOP Before switching on, please read the manual carefully. OPERATION CONTROL VALVE OVERVIEW WARNING: To prevent equipment damage and possible injury, always switch off sand filter before changing the Control Valve function. Changing valve positions while the pump is running can damage the Control Valve, which may cause personal injury or property damage. Filter: Closed: This function is used to filter pool water This function stops water and should be positioned here 99% of the time. flowing between the sand filter and the pool. Water is pumped through the sand filter, where it is cleaned and returned to the pool. NOTE: • Be sure all provisions for wastewater disposal meet applicable local, state or national codes. Do not discharge water where it will cause flooding or damage. 30 days for hoses, fittings and accessories included in the package from the original data of purchase. To enact a warranty claim, this form must be completed and supplied with a copy of your receipt/purchase to your local Bestway After Sales Center. #58401 Hmax 1.5m FILTRE A SABLE FLOWCLEAR™ MANUEL D'UTILISATION www.bestwaycorp.com 30 mA. Contrôlez et vérifiez SVP que tous les composants du filtre à sable sont présents avant l'utilisation. Informez Bestway à l'adresse du service clientèle répertoriée dans ce manuel en cas de dommage ou de pièces manquantes au moment de l'achat. SPECIFICATIONS Diamètre du filtre: 348mm Surface réelle de filtration: 0.095m (1.02ft Pression maximale de fonctionnement: 0.84Bar (12 PSI) Pression de fonctionnement du filtre à sable: < 0.45Bar (6.5PSI) Température maximale de l'eau: 35°C 348mm Sable: Non compris Dimensions du sable: #20 sable siliceux, 0,45-0,85mm 568mm Capacité... Montage (Vous aurez besoin d'un tournevis.) 1. Enlevez tous les composants de l'emballage et contrôlez que rien ne soit endommagé. Ø8mm 110mm The manual recommends placing the filter on a solid and level surface, preferably a concrete slab. Page 15 connects to the pool for a 38 mm (1.5 po) connection for pools with two valves P61318 P61322. The hose is not provided with this function, which serves for drainage, backwashing, and rinsing. Page 16 notes that before lighting up, please carefully read the instructions. **Overview of the Adjustment Valve** **Warning:** To avoid damage to the device or potential injuries, unplug each time the pump from the filter. Page 17 explains filtration: Closing off this function stops the filter from filtering water and closing the valve is on passage of water between the sand filter and the pool. **Note:** Control that all wastewater evacuation arrangements follow local or national regulations. Do not dispose of water where it could cause flooding or damage. When the adjustment valve is set to the positions of Backwashing, Rinsing, or Drainage, water is evacuated through orifice D of the adjustment valve. **Cleaning the Screen** 1. Unplug the sand filter and set the adjustment valve to the Closed position. 2. Replace the protective grilles with stoppers to prevent water from overflowing. 3. Remove the screen cover by unscrewing it. 4. **Important:** Only a damaged part will be replaced, not the entire unit. Bestway reserves the right to request photographs attesting to the defective state of parts or demand the return of the article for additional testing.
